Prologue

This seminar will provide an excellent opportunity for pharmaceutical scientist specially the young scientist's to explore and gain important insights into essential aspects of Quality by Design Approach. It is defined as " a systemic approach for development that begins with predefined objectives and emphasizes product and process understanding and process control, based on sound science and quality risk management." The main objective of the seminar is to impart basic knowledge about Quality by Design and how principles of QbD can be translated and applied in design development of tablet formulations.

Topics to be covered

Well known academicians and researchers will address the key topics as follows:

- Introduction to Quality by Design
- Designing of Experiment and Design space
- Brief introduction to different statistical tools
- Case study
